

Storyboard and Design Plan

Web Programming [CIT2011]
University of Technology, Jamaica

Field	Details
Student Name	Clive Bailey
Student ID	1403748
Programme	BSc. Computer Networking and Security
Major / Interest	Cybersecurity
Website Type	Personal portfolio website using HTML5 and CSS

Storyboard Overview

This storyboard presents the planned design for my personal portfolio website. It shows how the website will be arranged on desktop and mobile screens. It also includes the colour palette, typography, image dimensions, layout groups, navigation plan, GitHub repository link, hosting link, and storyboard PDF link.

The purpose of this storyboard is to guide the development of the website before and during coding. It helps ensure that the final webpages match the planned layout and maintain a consistent design theme.

Website Pages

- **Home:** Introduces the portfolio and includes demographic information.
- **Resume:** Presents education, skills, professional experience, mission, and vision.
- **Personality:** Discusses personality traits, hobbies, hero or mentor, and AI business idea.
- **Development:** Includes reflections on Chapters 4 to 7 of Twelve Pillars.
- **Storyboard:** Displays the design plan, wireframes, colour palette, and project links.
- **References:** Lists the sources used in APA format.

Layout Groups and Div Structure

The website layout is divided into clear groups so that each part of the page can be organized and styled properly using CSS.

- **Header group:** Contains the logo, website title, and navigation menu.
- **Logo area:** Groups the website logo and portfolio title together.
- **Navigation group:** Contains links to Home, Resume, Personality, Development, Storyboard, and References.
- **Hero group:** Contains the welcome message, call-to-action button, and profile image.
- **Demographic group:** Contains cards with personal, academic, and career information.
- **About group:** Contains a short description about me.
- **Favourite things group:** Contains cards for favourite book, movie, and technology area.
- **Contact group:** Contains email, GitHub, and location information.
- **Footer group:** Contains copyright information.

Desktop Layout Design

The desktop layout is designed for screens with a minimum width of 950px. In this layout, the logo and website title are on the left side of the header, while the navigation menu is on the right.

The welcome section uses a two-column layout. The welcome message and button appear on one side, while the profile image appears on the other side. The demographic information and favourite things sections use card-style layouts to keep the information neat and easy to read.

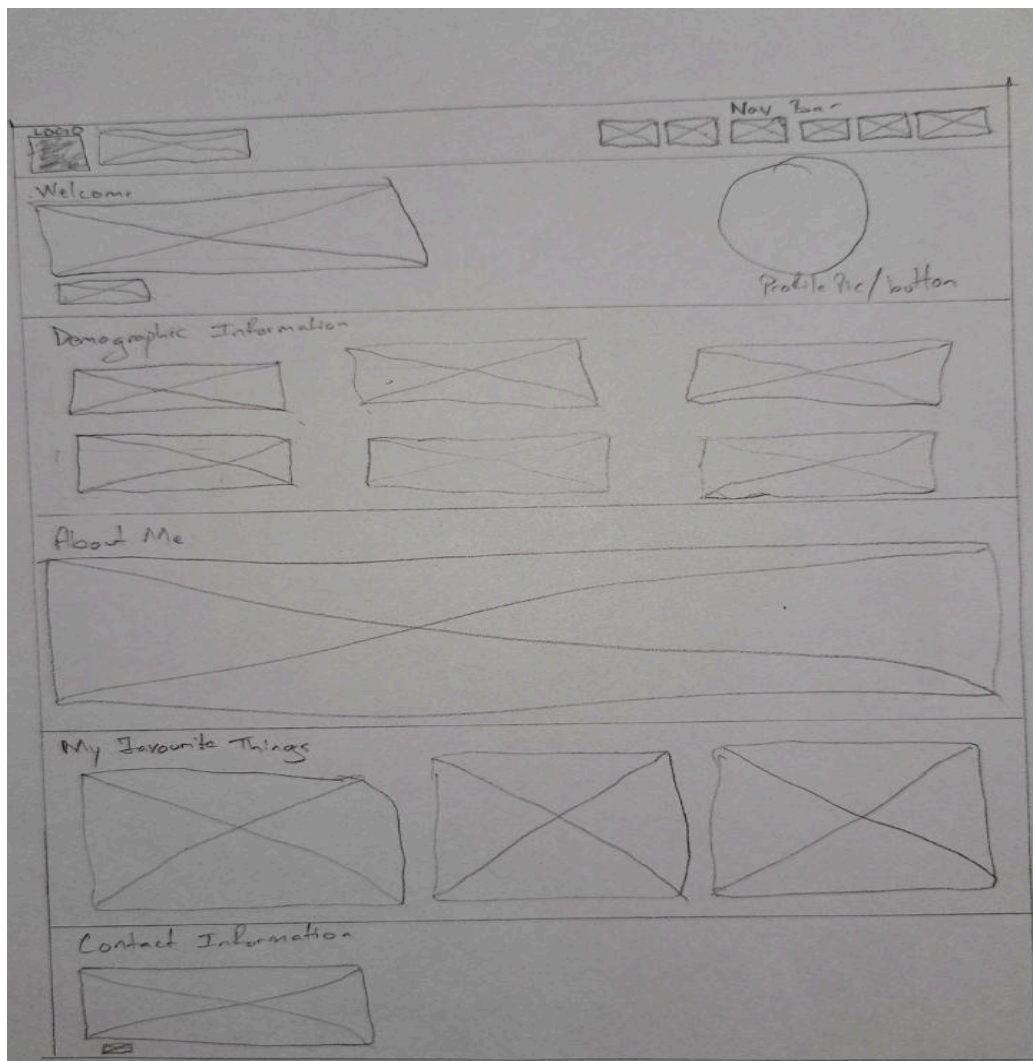

Figure 1. Desktop wireframe layout for the personal portfolio website.

Mobile Layout Design

The mobile layout is designed for screens with a minimum width of 600px. This layout uses a simplified structure to make the content easier to read on smaller screens. The logo is placed at the top, and the menu icon represents the mobile navigation area.

The welcome message, button, and profile image are placed near the top of the page. The demographic information cards are arranged in a smaller layout, while the About Me, Favourite Things, and Contact Information sections are stacked vertically.

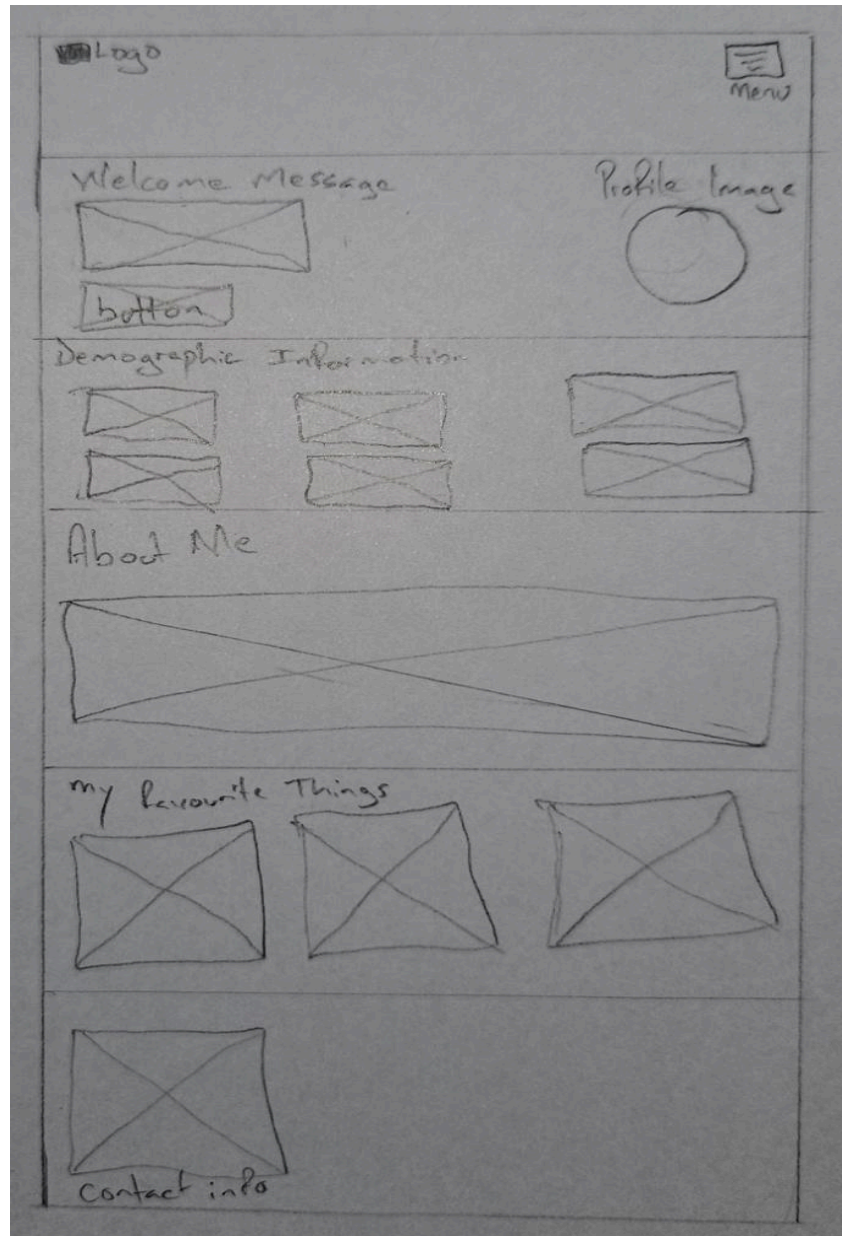

Figure 2. Mobile wireframe layout for the personal portfolio website.

Colour Palette

The website uses a professional colour palette with dark blue, sky blue, light grey, white, and dark blue-grey. This colour scheme was selected because it gives the portfolio a clean, modern, and technology-focused appearance.

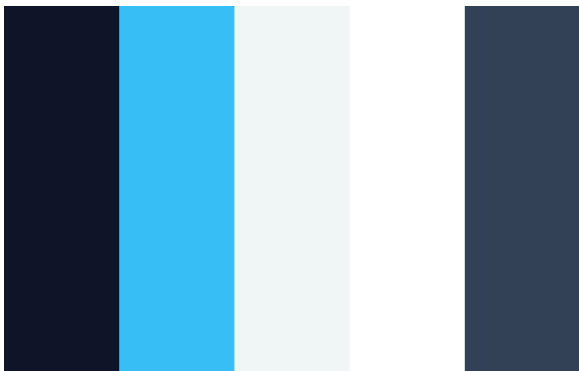

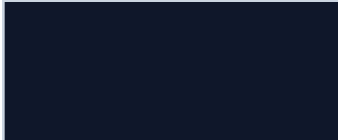

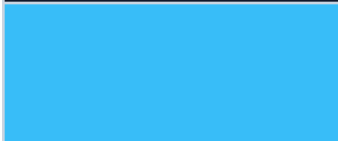

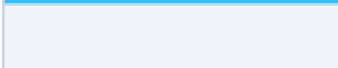

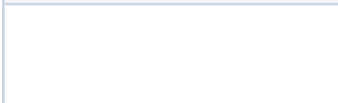

Figure 3. Colour palette selected for the portfolio website.

Swatch	Colour Name	RGB Value	Purpose
	Navy Blue	rgb(15, 23, 42)	Header, footer, headings, and strong text
	Sky Blue	rgb(56, 189, 248)	Buttons, links, highlights, and hover effects
	Light Grey	rgb(241, 245, 249)	Page background
	White	rgb(255, 255, 255)	Content sections and cards
	Dark Blue Grey	rgb(51, 65, 85)	Paragraph text and supporting information

Typography

The typography is simple and readable. This helps users clearly understand the information on both mobile and desktop screens.

- **Font family:** Arial, Helvetica, sans-serif
- **Root font weight:** 400
- **Heading font weight:** 700
- **Body text size:** 16px
- **Main heading size:** 32px
- **Section heading size:** 24px

Images, Icons, and Dimensions

All images and media files will be stored inside the Assets folder. Each image will include an alt attribute to improve accessibility.

- **Logo file:** logo.png
- **Logo dimensions:** 60px by 60px
- **Profile image dimensions:** 300px by 300px
- **Desktop wireframe file:** wireframe-desktop.jpg
- **Mobile wireframe file:** wireframe-mobile.jpg
- **Color palette file:** color-palette.png
- **Icons:** Simple portfolio, technology, and cybersecurity-style icons

Navigation Plan

The navigation bar appears at the top of every webpage. It allows users to move easily between the main pages of the portfolio website.

- Home
- Resume
- Personality
- Development
- Storyboard
- References

Responsive Design Plan

The website will use CSS media queries to adjust the layout for different screen sizes. This will make the website usable on mobile, tablet, and desktop screens.

- **Mobile layout, 600px and above:** Content is stacked vertically, and cards are arranged in a simple layout for easier reading.
- **Desktop layout, 950px and above:** The header becomes wider, the navigation appears horizontally, and content cards are arranged in columns.
- **Layout method:** CSS Flexbox and CSS Grid will be used to create organized and responsive sections.

Project Links

These links will be updated after the portfolio website is uploaded to GitHub and hosted online.

Final Design Summary

The final website will be responsive, organized, and visually consistent. The mobile design will focus on readability and simple vertical scrolling, while the desktop design will use more spacing, grid layouts, and card sections. This storyboard will guide the final design so the finished portfolio matches the planned layout.
